PROFESSIONAL SUMMARY

Multidisciplinary innovator and founder of UTSHAS and a TEDx chapter, passionate about electronics, PCB design, and open-source software development. Led high-altitude balloon missions reaching ~32,000 m, developed satellite decoders for SatNOGS, presented at and attended professional conferences including BlueSciCon and SmallSat Education 2024 and 2025. Recognized at the Toronto Science Fair, Conrad Challenge, and Worldbuild.ai. Beyond engineering, a budding jazz musician with two MusicFest Canada National Gold awards, an Honours Award at Nationals 2025, an RCM Grade 10 certification, and a Yamaha Grade 5, alongside an Amateur Radio Certificate of Proficiency (Basic with Honours).

WORK EXPERIENCE

Oakville Center for Vision: Co-lead Software Engineer **Mar 2025 - Present**

- Responsible for developing software in C, C# and Python for novel CCV technology for difference eye tracking goggles.
- Coordinated communication between software and hardware teams to maintain alignment on development milestones and technical requirements.

Camp Tamias Programming Teacher **June 2025 - Present**

- Led curriculum development and instruction as part of an international team, guiding teens aged 12–16 from zero coding experience to Python proficiency through an immersive two-week bootcamp with 3-hour daily sessions.
- Instructed online and in-person classes with sizes up to 12, adapting teaching styles and formats to ensure engagement and effective time use.

VOLUNTEERING AND LEADERSHIP

- Founded and led the University of Toronto Schools High Altitude Society (UTSHAS), one of UTS's only engineering-focused clubs, providing students with hands-on access to near-space engineering through DIY high-altitude balloon missions and electronics workshops.
- Founding member of TEDxUTS Youth chapter, facilitated the complete organization and production of events for two consecutive years reaching 100+ attendees.
- Licensed amateur radio operator volunteering at Canada's Warplane Heritage Museum, conducting live contacts, Morse code demonstrations, and restoration and exhibition of vintage radio equipment for hundreds of visitors yearly.

PROJECTS & KEY SKILLS

- Mixed-signal PCB design
- Design of functional telemetry protocols
- Basic with Honours Ham Radio certification
- Functional knowledge of Python, C and C++
- Fluent in Russian, intermediate French and Spanish
- RCM10 Piano certification

EDUCATION

University of Toronto Schools | 2024-2027 (expected graduation)

University of Toronto Schools - Grade 11 Student

- Science + Math GPA: 96%
- Humanities + Career Studies GPA: 94%
